

# \_ImagesFR

The images attached to this page are used on more than one page and even in more than one space.

This folder is for images in FRENCH ONLY. English images have [\\_Images](#), Spanish images have [\\_ImagesES](#).

**To the documentation authors:** When updating these images to a later version, make sure you *replac* the image with one of the same name, rather than adding a new one with a slightly different name. This will ensure that the up-to-date image is used on all the pages that display it.

You can insert the images directly into a page — there's no need to attach them to the page itself. Here's an example of how to do that:

```
!_ImagesFR^myImage.png!
```
